Rc. No. 126/C/2016 Dt.23.02.2017

Sub: Animal Husbandry Department – Conversion of electricity charges to Chaff Cutters from Category (4) to Category (5) i.e., Commercial sector to Agriculture sector and charge the rates accordingly – Regarding.

Ref : Video Conference held on 15.02.2017 by the Chief Secretary, TS, Hyderabad attended by the District Collector and District Veterinary & Animal Husbandry Officer, Yadadri-Bhongir.

-00000-

I invite kind attention to the reference cited, as informed in the video conference held on 15.02.2017, the Electricity Department is charging commercial category charges to the Chaff Cutters for cutting fodder grass to feed the animals instead of charging Agriculture category charges which becomes burden to the farmers.

Further, I am to inform that at present Rs. 4/- is being charged per unit under category (4). If converted to category (5), only maintenance charges of Rs.30/- per month will be charged. This not only benefit the farmers financially but also helps in effective use of chaffed fodder to increase milk production.

It is here by suggested to convert the charges of electricity of Chaff Cutters from Category (4) to Category (5) i.e., Commercial category to Agriculture category since the Chaff Cutters are **supplied on subsidy (50%)** under various state and central government programmes and change the rates accordingly.
